

58MM High Definition 2.5x Telephoto Lens

User's Manual

Specifications

Power: 2.5x time conversion factor of your current lens setting plus a macro mode.

Optical System: Conversion type mounts on the front of existing lens.

Optics: Designed to maximize use day and night with optics coating to provide maximum image transmission with minimal distortion.

Adaptability: Maintains all the camera functions.

Compatibility: 58mm or Series 7 Mount for all standard VHS-C & 8mm camcorders or 35mm camera with a filter mount size of 58mm or Series 7 (A series 7 adaptor ring may be used where other mounting sizes are necessary)

How to Use Your Lens

Step 1: This converter lens mounts into filter accessory threads on your existing camera lens.

58MM or Series 7 Mount

If you require another size, use an optical Series 7 adaptor ring to obtain the proper fit for your camera.

Step 2: Use your camera as you normally would. This lens maintains all the original functions plus providing 2.5x telephoto lens conversion power when required.

Step 3: For best results use smallest lens opening and set the focus to infinity. For close ups use a closer focusing range to obtain the desired results.
