

Connection & Using Your Card Reader

- Plug your card reader into a free USB port on your Laptop/PC first.
- Wait until Windows has installed the correct drivers.
- Start using your Card Reader/Writer.
- Insert your memory card into the slot of your card reader
- Open "My Computer" on your desktop, using the unit as an extra disk.

Note: Please do not remove your card reader, or your memory card from the card reader before safely removing the card reader from your computer as that will damage your data.

Attention

- In case your card reader is not detected, please check whether the card reader has been correctly connected to the USB port; please make sure the power supply from the USB upstream is high enough.
- In case your memory card does not fit into the card reader, please insert the card into the card reader with the arrow pointing upwards. Do not force the card into the card reader.
- Please do not open the card reader/writer by yourself. For assistance operating your card reader/writer please feel free to contact Targus Digital technical support:
